

VIGNESH S

SOFTWARE DEVELOPER (Front-End)

solaivignesh60@gmail.com | 9345377252 | LinkedIn | Github

SUMMARY

Front-End focused Software Developer with **1+ years of professional experience** in building scalable, responsive, and high-performance web applications. Strong expertise in **React.js, JavaScript, HTML5, CSS3**, and REST API integration. Experienced in collaborating with cross-functional teams, implementing clean UI/UX designs, and optimizing application performance. Passionate about writing maintainable code and continuously learning modern web technologies.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI

APIs & Tools: REST APIs, Axios, Fetch API, EmailJS

Version Control: Git, GitHub

PROFESSIONAL EXPERIENCE

Why Digit System Private Limited | 2024 – Present

- Delivered **5+ production-ready frontend applications** using React.js, JavaScript (ES6+), HTML5, and CSS3.
- Connected applications to **50+ backend endpoints** via Axios and Fetch to support real-time business workflows.
- Partnered with **design and backend teams** to translate UI/UX designs into scalable, maintainable interfaces.
- Enhanced application efficiency by **optimizing component rendering and asset loading**, achieving 30% faster load times.
- Validated UI behavior across **multiple browsers and mobile devices**, ensuring consistent user experience.

PROJECTS

Elevate – Financial Platform

- Created a web platform supporting **virtual CFO services** for mid- and large-scale businesses.
- Delivered interactive dashboards for **financial planning, forecasting, and reporting**.
- Simplified accounting operations by **automating recurring financial processes**.

Human Resource Management System (HRMS)

- Engineered an internal HR platform to handle **employee profiles, attendance logs, and daily check-ins**.
- Streamlined HR operations by configuring **approval-based leave workflows** with automated status updates.
- Strengthened data reliability through **centralized storage and role-based access**.

Vehicle Management System

- Architected a centralized **Vehicle Management System** to organize vehicle, driver, tyre, fuel, maintenance, trip, and invoice records.
- Designed data-driven modules supporting **100+ fleet records**, enabling trip tracking, fuel analysis, and service history monitoring.
- Enabled real-time operational insights through **API-driven data flows and a mobile-friendly React.js interface**.

EDUCATION

- **B.E Electronics and Communication Engineering | 2020 – 2024**

SNS College of Technology – CGPA – 8.3

- **HSC | 2019 – 2020**

Sri Sankara Matric Hr. Sec School – Percentage – 75%
